

Swiss Institute of Bioinformatics

SINGLE-CELL TRANSCRIPTOMICS WITH R

Post-course Information

Deepak Tanwar

November 11-13 2026

sc-best-practices.org

Exam

To obtain ECTS / to test yourself

Deadline: Friday, November 20th 23:59

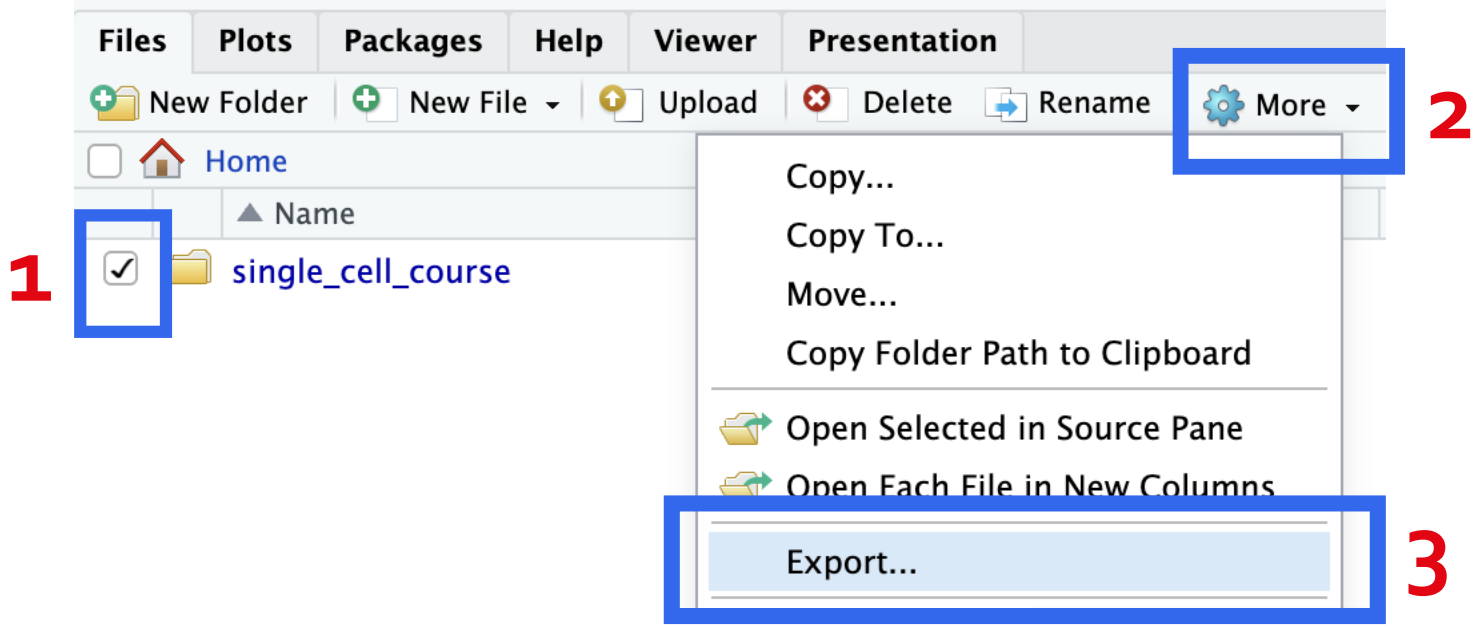

https://forms.office.com/e/ug3ybx1wCY

Course material

All material will stay online.

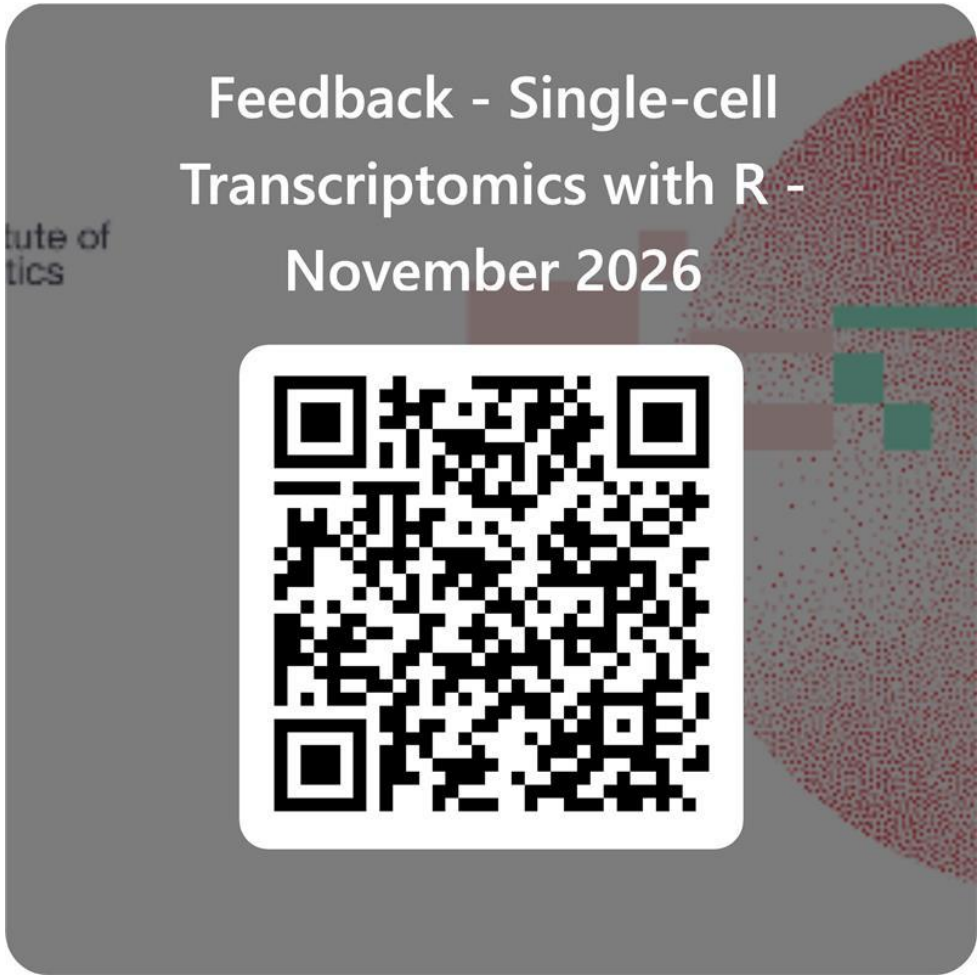

Cloud will be deleted today at **7:55 pm**, so please copy your data to your preferred location.

GitHub: https://github.com/sib-swiss/single-cell-r-training/

Feedback for the course

- Email from the training manager
- Please provide feedback by next week
- https://forms.cloud.microsoft/e/z9MnRyzLP4
- Certificates will be sent after maximum feedback received

Upcoming courses

sib.swiss/training/upcoming-training-courses

Enrichment Analysis

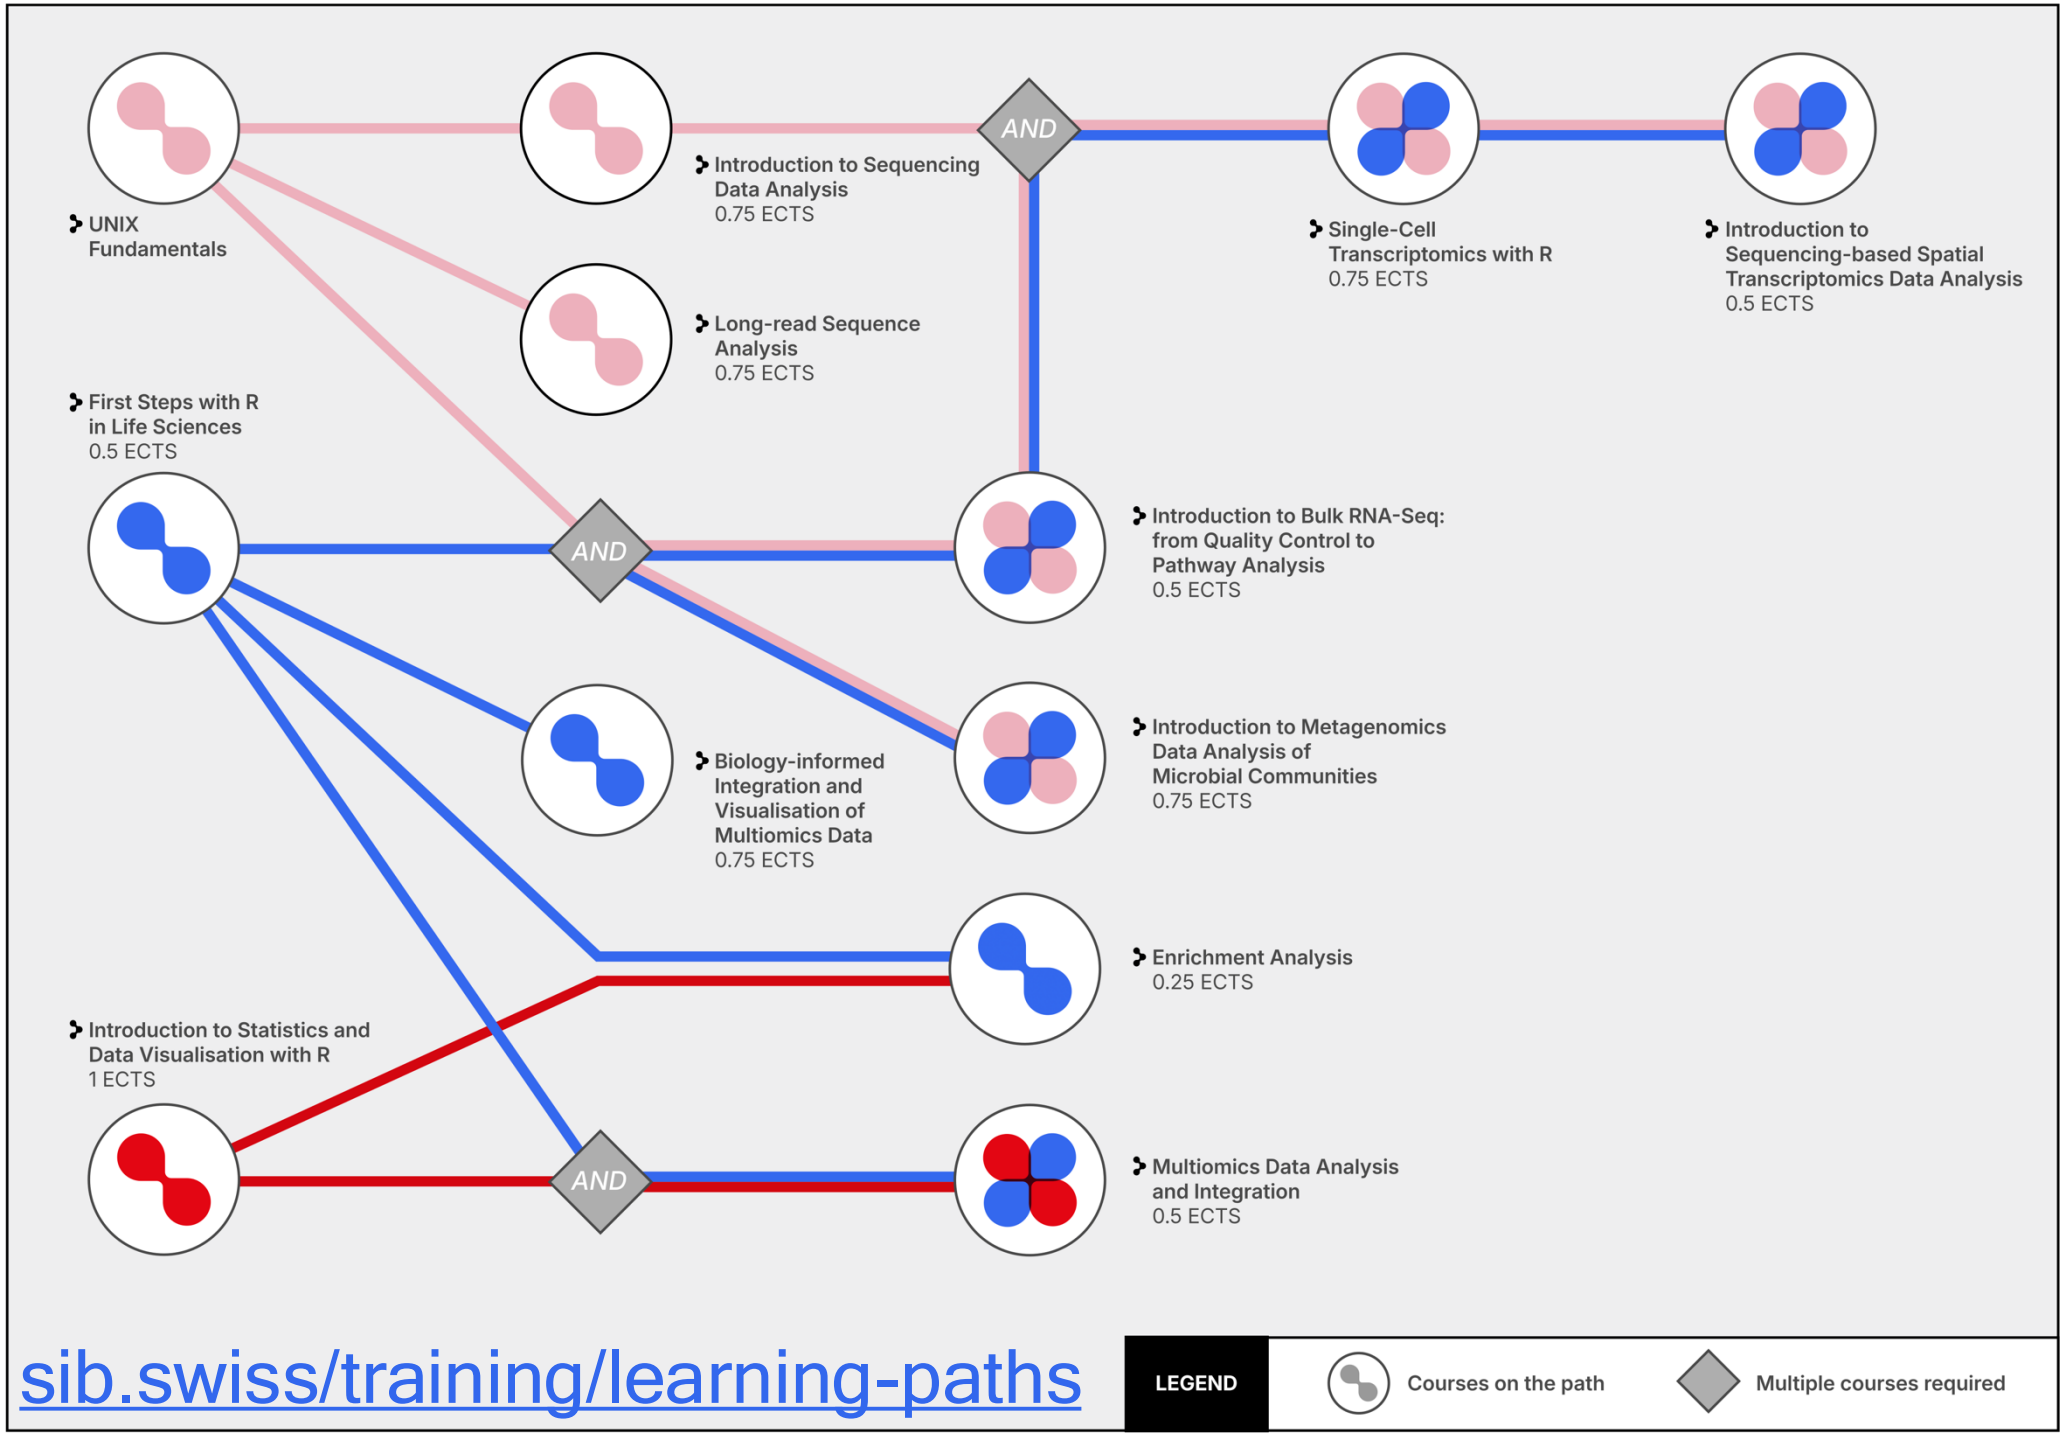

Introduction to Spatial Transcriptomics Data Analysis

Genomes to Action: AMR in Bacteria

Biological Large Language Models for Bioinformatics

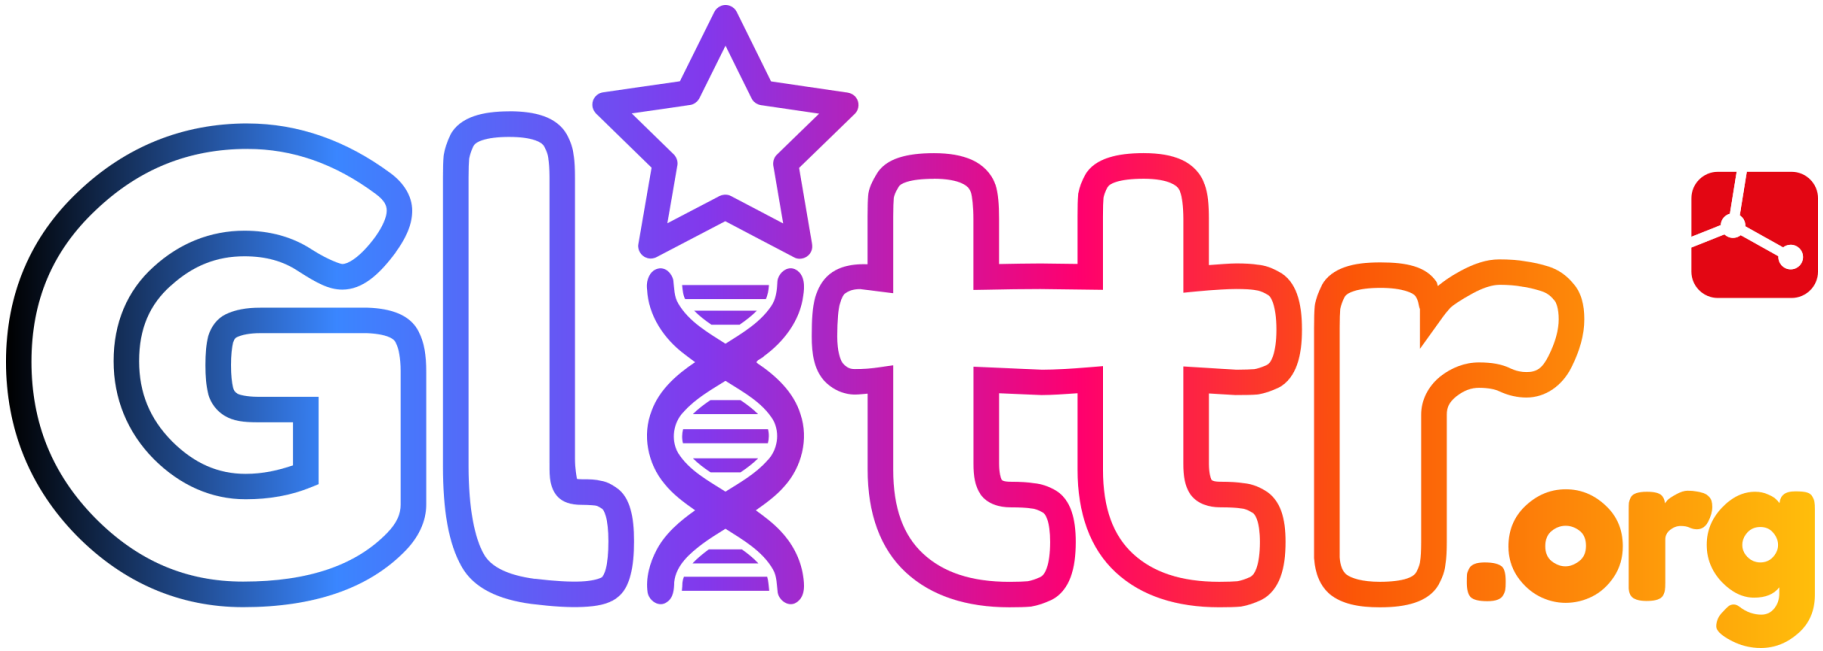

Data Visualisation with R

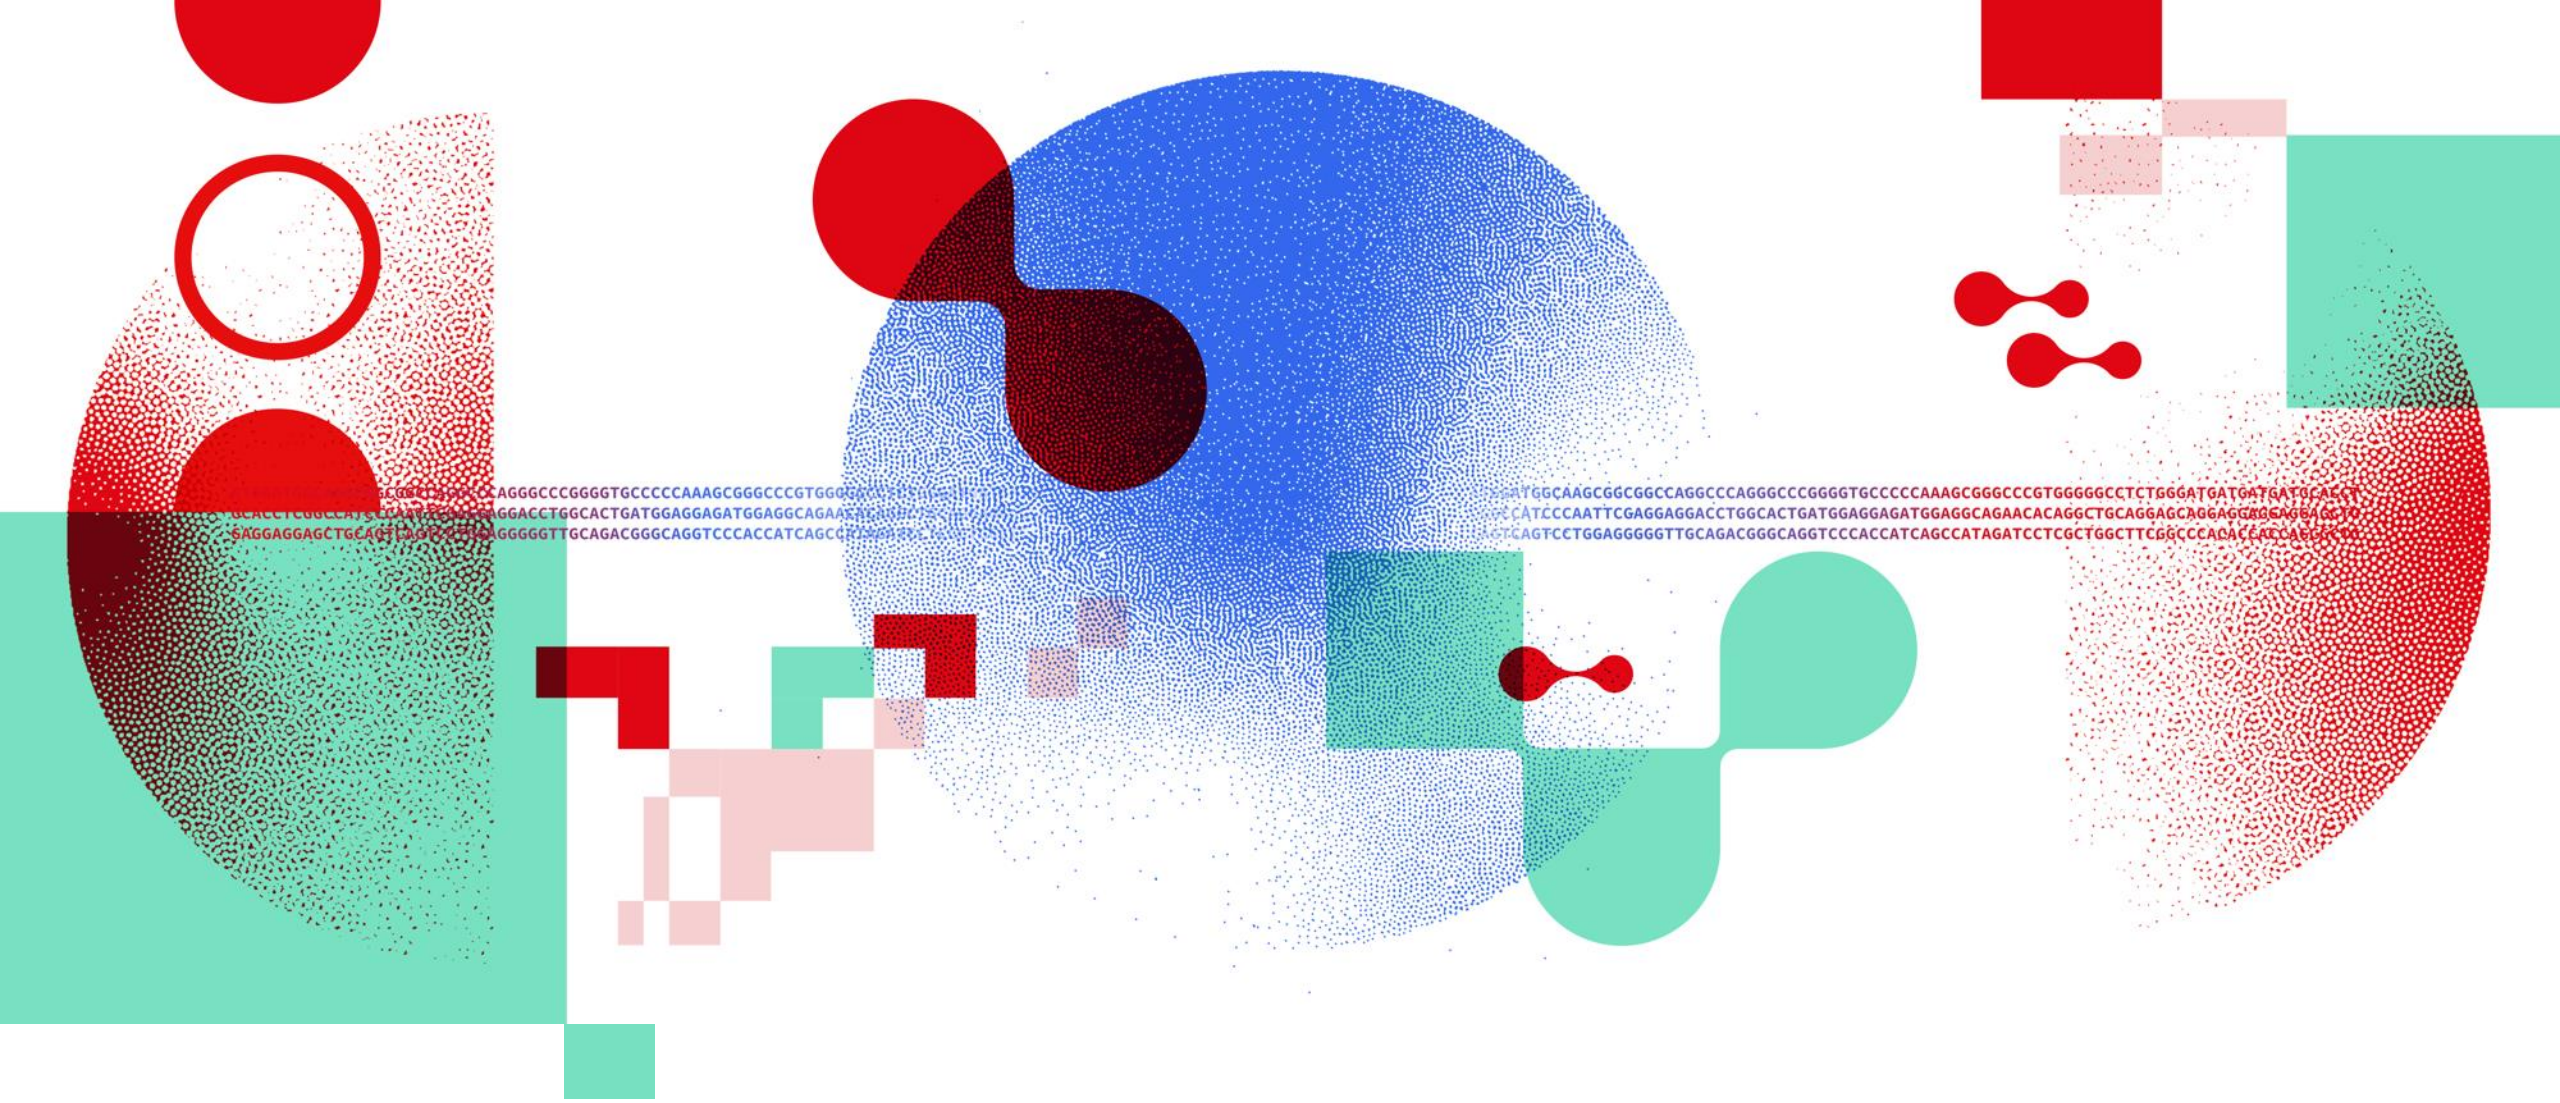

Evaluating computational methods with Omnibenchmark

UNIX Fundamentals
Introduction to Sequencing Data Analysis
0.75 ECTS
Long-read Sequence Analysis
0.75 ECTS
AND
Single-Cell Transcriptomics with R
0.75 ECTS
Introduction to Sequencing-based Spatial Transcriptomics Data Analysis
0.5 ECTS
First Steps with R in Life Sciences
0.5 ECTS
AND
Introduction to Bulk RNA-Seq: from Quality Control to Pathway Analysis
0.5 ECTS
Biology-informed Integration and Visualisation of Multiomics Data
0.75 ECTS
Introduction to Metagenomics Data Analysis of Microbial Communities
0.75 ECTS
Enrichment Analysis
0.25 ECTS
Introduction to Statistics and Data Visualisation with R
1 ECTS
AND
Multiomics Data Analysis and Integration
0.5 ECTS
sib.swiss/training/learning-paths
LEGEND
Courses on the path
Multiple courses required

Other interesting stuff
